Door Profile Options

All shapes available in aluminum. Brass available in SD, RD & BD only.

* AccentTrack door accommodates insert materials 1" wide and up to .090" thick, furnished either by APCO or by customer.

** Specifications for Floating Glass Door Profile are illustrated on separate Shop Drawing 2210.2 Full Recessed - Floating Glass.

Door Operating Clearance

A 1" wide Reveal (tube) is attached to the cabinet at a 1-1/2" depth to maintain proper door operation. A decorative, non-structural trim is then attached to the tube.

IMPORTANT :
See "Installation / Mounting Details" page to determine Cavity Dimensions.

Note 1

Wall cavity size is determined by adding cabinet housing, surrounding reveal, trim and installation clearance. Trim styles and cavity opening calculations for each are illustrated on "Installation / Mounting Details" page.

Note 2

Dimensions for determining illuminated area are calculated by subtracting 4-3/8" from both the directory's standard height* and width.

Height _____ - 4-3/8" = _____ (Illuminated Area)
Width _____ - 4-3/8" = _____ (Illuminated Area)

† NS35 copy length is 2-1/4". Copy height is limited to 1/8" (approximately 23 characters.)

†† NS55 copy length is 4-3/16". Copy height should be specified to fit within this area.

* Standard directory heights are based on available lamp lengths.

Installation / Mounting Details

IMPORTANT :
APCO IS NOT RESPONSIBLE FOR CAVITY CONSTRUCTION WHICH VARIES FROM SPECIFICATIONS SHOWN ON THIS PAGE. Cavity opening size must be precisely constructed in terms of both size and squareness. Size calculations and cavity opening tolerances are shown below for each trim style.

Elevation : Front View

Section : Side View

Cavity Size : Standard

Continuous Angle

The Continuous Angle is recommended to conceal rough cut openings while allowing for inconsistencies in cavity size. It also helps to avoid obstruction of the reveal area which is required for proper door operation. To determine cavity opening, add 2-3/4" to both the cabinet's height and width.

$$\text{Cabinet Height} + 2\text{-}3/4" = \text{Cavity Height}$$

$$\text{Cabinet Width} + 2\text{-}3/4" = \text{Cavity Width}$$

These calculations include a 1" Reveal, 1/8" thick Continuous Angle and 1/2" total installation clearance.
Overall cavity tolerance is +/- 1/8".

Cavity Size : Optional

"Flat Bar" Trim

A 1/8" wide "Flat Bar" can be substituted when the 1" wide Continuous Angle is not desired. To determine cavity opening, add 2-3/8" to both the cabinet's height and width.

$$\text{Cabinet Height} + 2\text{-}3/8" = \text{Cavity Height}$$

$$\text{Cabinet Width} + 2\text{-}3/8" = \text{Cavity Width}$$

These calculations include a 1" Reveal, 1/8" thick Flat Bar and 1/8" total installation clearance.
Overall cavity tolerance is +1/8", minus 0".

Cavity Size : Optional

Angle / Trim Omitted

When cavity space is a factor, the surrounding trim can be eliminated to obtain the largest directory/cavity combination. The 1" reveal remains to maintain proper door operation. To determine cavity opening, add 2-1/8" to both the cabinet's height and width.

$$\text{Cabinet Height} + 2\text{-}1/8" = \text{Cavity Height}$$

$$\text{Cabinet Width} + 2\text{-}1/8" = \text{Cavity Width}$$

These calculations include a 1" Reveal and 1/8" total installation clearance.
Overall cavity tolerance is +1/8", minus 0".
