Door Profile Options

All shapes available in aluminum.

Prop Rods

Top hinged doors up to 30 lbs. are equipped with concealed prop rods.

Door Operating Clearance

Front face of door must protrude a minimum 1-1/2" from surrounding surface for door to fully open. Any variation may require factory changes.

IMPORTANT :
See "Installation / Mounting Details" page to determine Cavity Dimensions.

- Left
- Top with Prop Rod Door Supports
(Opens approx. 60°, See Note 4)
- Other _____

Door Locking Device

- 3M "Dual Lock" Fastener (Included)

Glazing

- Clear Tempered Safety Glass
(See Note 3)

Note 1

Wall cavity size is determined by adding cabinet housing, surrounding reveal and installation clearance. Cavity opening calculations for a standard 1/2" wide reveal is illustrated on "Installation / Mounting Details" page.

Note 2

Display area is calculated by subtracting 3" from both the cabinet housing's height and width. (Also See Note 4)

Height _____ - 3" = _____ Width _____ - 3" = _____
(Display Area) (Display Area)

Note 3

Clear glass has a natural slight green tint. Though typically unnoticeable, it may affect the appearance of certain colors. Composite glazing (i.e. Acrylic, Lexan, etc.) is not used. These materials are not as strong as tempered glass, they are more vulnerable to scratches and expansion enhances imperfections in their natural uneven and wavy surfaces.

Note 4

Top hinged aluminum doors exceeding 8.5 sq.ft. and top hinged brass doors exceeding 5.7 sq.ft. require gas cylinder "assist". To accommodate gas cylinders, the "GC" cabinet is required. This variation affects product depth and size of display area. Use separate Shop Drawing 2300.1GC to specify the heavier, top hinged, Semi-Recessed Visulines.

Note 5

All display components are available for interior use. Refer to Product Technical Manual for those components approved for exterior applications.

Reveal

- 1/2" Wide (Standard)
- Other _____

Installation / Mounting Details

Section : Plan View

IMPORTANT :

APCO IS NOT RESPONSIBLE FOR CAVITY CONSTRUCTION WHICH VARIES FROM SPECIFICATIONS SHOWN ON THIS PAGE. Wall cavity opening must be precisely constructed in terms of size, squareness and depth. Size calculations and cavity opening tolerances are shown below.

Elevation : Front View

Section : Side View

Cavity Size : Standard

1/2" Reveal

A standard 1/2" perimeter Reveal is provided to offset the variance between the cabinet housing and the cavity. To determine cavity opening, add 1-1/8" to both the cabinet's height and width.

$$\boxed{\text{Cabinet Height}} + 1-1/8" = \boxed{\text{Cavity Height}}$$

$$\boxed{\text{Cabinet Width}} + 1-1/8" = \boxed{\text{Cavity Width}}$$

These calculations include a 1/2" Reveal and 1/16" installation clearance around full perimeter.

Overall cavity tolerance is +1/8", minus 0".
