Door Profile Options

All shapes available in aluminum. Brass available in SD, RD & BD only.

* AccentTrack door accommodates insert materials 1" wide and up to .090" thick, furnished either by APCO or by customer.

Door Operating Clearance

Front face of door must protrude a minimum 1-1/2" from surrounding surface for door to fully open. Any variation may require factory changes.

IMPORTANT :
See "Installation / Mounting Details" page to determine Cavity Dimensions.

Custom Components

- Complete Specifications Provided

Note 1

Wall cavity size is determined by adding cabinet housing, surrounding reveal and installation clearance. Cavity opening calculations for a standard 1/2" wide reveal is illustrated on "Installation / Mounting Details" page.

Note 2

Display area is calculated by subtracting 10-13/16" from cabinet height and 4-1/16" from cabinet width.

$$\frac{\text{Cabinet Height}}{\text{Cabinet Height}} - 10 \frac{13}{16}'' = \frac{\text{Display Height}}{\text{Display Height}} \quad \frac{\text{Cabinet Width}}{\text{Cabinet Width}} - 4 \frac{1}{16}'' = \frac{\text{Display Width}}{\text{Display Width}}$$

Note 3

Clear glass has a natural slight green tint. Though typically unnoticeable, it may affect the appearance of certain colors.

Note 4

All display components are available for interior use. Refer to Product Technical Manual for those components approved for exterior applications.

Visuline® 2400.1 Series with DisplayLight™ Semi-Recessed Display

Installation / Mounting Details

Section : Plan View

IMPORTANT :
APCO IS NOT RESPONSIBLE FOR CAVITY CONSTRUCTION WHICH VARIES FROM SPECIFICATIONS SHOWN ON THIS PAGE. Cavity opening size must be precisely constructed in terms of both size and squareness. Size calculations and cavity opening tolerances are shown below.

Elevation : Front View

Section : Side View

Cavity Size : Standard

1/2" Reveal

A standard 1/2" perimeter Reveal is provided to offset the variance between the cabinet housing and the cavity. To determine cavity opening, add 1-1/8" to both the cabinet's height and width.

$$\boxed{\text{Cabinet Height}} + 1-1/8" = \boxed{\text{Cavity Height}}$$

$$\boxed{\text{Cabinet Width}} + 1-1/8" = \boxed{\text{Cavity Width}}$$

These calculations include a 1/2" Reveal and 1/16" installation clearance around full perimeter.

Overall cavity tolerance is +1/8", minus 0".
