# Dimensional Graphics

## Channel Letters MG-CH Series

Channel Letters generally incorporate an acrylic face with an Aluminum or Stainless Steel return (body). Faces are offered in a wide range of colors, either translucent or opaque. Metal returns are available in Anodized, Brushed or Polyurethane finishes. LED illumination options include face-lit and/or halo-lit.

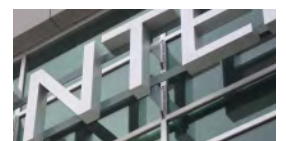

## Precision Cut Metal MG-PC Series

Letters are precision cut from solid metal plate using state-of-the-art technology and featuring hand-crafted finishes. Material options include Aluminum, Brass, Stainless Steel, Copper and Bronze. Finishes include Satin #4 and #6, Mirror #8, Chrome Plate, Oxidized, Patinas, Polyurethane, Anodized Clear and Custom Textures & Patterns. Sizes range from 1" to 24", and thickness ranges from 1/8" to 1/2". Mounting is via high bond vinyl tape and silicone or via studs, either flush or stand-off.

## Fabricated MG-F Series

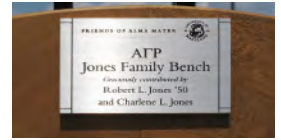

Fabricated Metal Graphics are ideally suited for bold, deep letter forms and are offered in a wide range of metals, colors, finishes and thicknesses. Material options include Aluminum, Brass, Bronze, Copper, Stainless Steel & Polyurethane. Finishes include Satin #4 and #6, Chrome Plate, Oxidized, Patinas, Polyurethane, Anodized Clear and Custom Textures & Patterns. LED halo illumination is available. Sizes range from 3" up, and thickness range from 3/8" to 24". Attachment is via stud mounting, either flush or stand-off.

## Cast/Etched Plaques MG-C Series

Enduring quality and versatile design combine to offer an exceptional solution for Dedication Plaques, Recognition Markers, Government Seals and more. Cast material options include Bronze or Aluminum. Etched material options include Aluminum, Bronze, Brass, Copper or Stainless Steel. Sizes range from 6" up, and thickness ranges from 1/16" up.

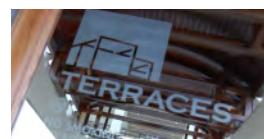

## Precision Cut Acrylic AG-PC Series

Precision-cut using state-of-the-art technology, Acrylic is an excellent option for interior letters and logos. Color options include 1st Surface or SubSurface Polyurethane, 1st Surface or SubSurface Direct-Print or Applied Vinyl. Sizes range from 1" to 24", and thickness ranges from 1/8" to 1". Mounting is via high bond vinyl tape and silicone or via studs, either flush or stand-off.

## Vinyl Graphics PSV

Pressure Sensitive Vinyl (PSV) Graphics can be applied to glass and a variety of other smooth surfaces, in both interior and exterior environments. Select from a wide range of color and material options, including opaque, translucent, metallic, reflective, gloss, matte and frosted. Character sizes range from 1/2" to 48".
