

**CLEANING**

Your exterior APCO products are designed, engineered, and manufactured to provide years of service, but similar to an automobile that's outside in the elements, routine cleaning is essential to keep your signs looking good.

Protect your exterior APCO product's finish with frequent washing. Wipe with a mild solution of liquid dish detergent and lukewarm water. Use a clean, soft cloth or sponge. Dry with a damp cloth or chamois.

Do NOT wash in hot water or with high pressure cleaning equipment, and do NOT wash in direct rays of sun or while sign surfaces are hot.

Signs subject to airborne pollen, insect droppings, bird droppings or other organic material must be washed as often as necessary to keep them free of this material. Similar precautions should be taken when signs are exposed to chemical industrial fallout. Failure to do so may result in surface damage and void your product's warranty.

**POLYURETHANE COATED SURFACES**

APCO's 2-component polyurethane paint is a tough, durable finish that if properly maintained, will retain its value for years. The finish, like with an automobile, can also be damaged if cleaned with abrasive materials. Avoid such products as scouring compounds, gritty cloths, steel wool, etc. The result may cause discoloration and/or paint deterioration.

**ANODIZED ALUMINUM SURFACES**

These finishes may be scratched and damaged if cleaned with abrasive materials. They may also be damaged by such products as scouring compounds, gritty cloths, steel wool, gasoline or solvents such as alcohol, acetone, kerosene, carbon tetrachloride, naphtha or any aromatic hydrocarbons. The results may cause discoloration and/or deterioration.
